

# Citizen Identity and Access Management for Government

Make services easily accessible

# Getting digital identity right provides a strong front door to your organisation

# If you **don't understand** how **citizen data is protected**, it is not protected well enough

Do you **understand** your **legal obligations** for data protection?

What will you do **when** (not if) **a data breach** occurs?

Are you **confident** your citizen data is **properly secured**?

# It starts with identity, and we are here to help

Build identity services that  
respect preference and choice

# Assess

1

We assess Microsoft identity technologies in context

2

We will identify the problem to solve and requirements in scope

3

We will test identity capabilities to reassure business stakeholders

4

Your business assesses whether Condatis is a reliable delivery partner

# Plan

5

We develop a strategy to achieve tactical quick-wins and plan long-term

6

We produce high-level design documentation to clearly set vision and scope

7

We plan for success and set a timeline for Live and business as usual

8

We estimate effort to work with your team to deliver on strategy, plan and timeline

# What do I get?

## Assess

1x ½ day on-site workshop: identity fundamentals on Azure

1x ½ day workshop: identity requirements in business context

1x ½ day on-site workshop: whiteboard solution design

Organisation requirements: Proof of Concept (PoC) functionality

## Deliverable

**D1**

**D2**

**D3**

**D4**

## Plan

IAM strategy document

High-level design document

Indicative timeline and project plan

Implementation effort estimate

## Deliverable

**D5**

**D6**

**D7**

**D8**
