Our Identity Journey

1989

Initially part of the Sitekit group, developing CMS and PHR.

<sitekit>

2016

UK's first configuration of Microsoft Azure AD B2C for long term customer, Nuffield Health

2019

Hello, **Condatis!**

condatis

2020 - 2021

Working with **Microsoft on Entra VC** private preview.

2022

Introducing, **Condatis Credential Gateway!**

HM Government

Working with UK Government Digital identity programs, supporting manual ID vouching

2014

Expanded into FSI working on the Mastercard MIDS platform. Started first **Decentralized Identity PoC.**

2018

<sitekit> **NHS**^x

Covid-19 Response, NHS Digital Staff Passport to enable staff movement.

2019

New decentralized identity projects and further development of NHS DSP using Microsoft platform.

2021 - 2022

Driving Innovation in Higher Education

Identity is central to your student experience

- Full identity journey
 - Advisory; you know what you need to achieve.
 - Solution; we can design and deliver to meet your needs.
 - Service; we support, maintain and enhance the solution we deliver.

How and why do we reprioritise **identity**?

“Why” do we reprioritise identity?

1. Improves student experience
2. Increases cost and time efficiencies
3. Offers enhanced security

“How” do we reprioritise identity?

“I am who I say I am”

My data, **my identity**.

- My personal identifiable records
- Training records
- Academic history
- Digital badges and skills

Improving **student experience**

Example: Onboarding a prospective student

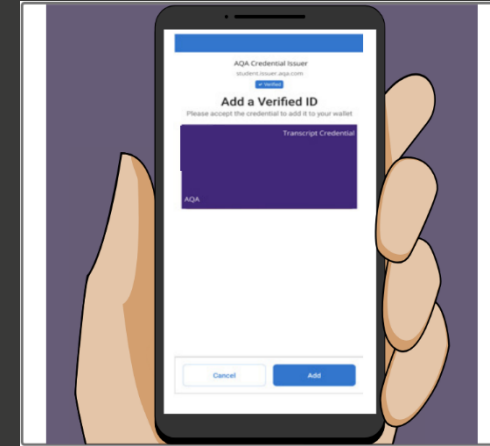

Student Transcript Credentials

Student graduates high school

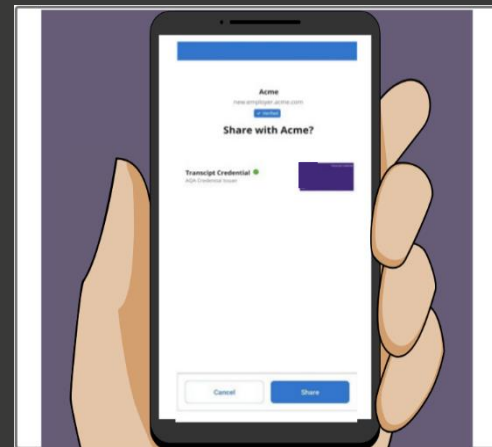

Student receives their digital transcript

Student receives their transcript as a verifiable credential

Student arrives for their induction with their new employer

Student shares transcript with new employer

Student starts work in their new job

Customer Success Story Royal Melbourne Institute of Technology

Shaping the lives of
95,000 students
globally

Decentralized ID (Student,
alumni, training credentials)
Issuing digital credentials
in seconds instead of 14
days
Interoperable with
existing IT infrastructure

Verifiable credentials
(digital wallet)

Students self-manage
data distribution

Ease of identifying
students across a
distributed campus
